NOTICE.

TO OWNERS OF MINES.

THESE having Gold upon their lands in vein surface or deposit mines, which they wish explored, would do well to give the subscribers a call or notice, post paid, at Gold Hill, Rowan Co., N. C., as we wish to lease and operate more extensively in the Mining Business. Good Miners will be despatched immediately to examine and test such mines as may be offered, but no lease will be given without the privilege of leasing, and no lease taken for a shorter term than three years. As persons often obtain leases without any intention of operating sufficiently to test the mines and thereby keep an encumbrance upon the premises to the prejudice of both lessor and those really desirous of thoroughly exploring them, the subscribers would say, that whenever they lease they will fairly test the mine.

A VERY VALUABLE

GOLD MINE,
FOR SALE.

THE undersigned having qualified as the Executrix of the last Will and Testament of JOHN REID, Senior, deceased, will sell upon the premises, in Cabarrus county, in the State of North Carolina, on Thursday, the 5th day of February next, the valuable

GOLD MINE, known as

THE Reid Mine.

This Gold Mine has the reputation of being one of the richest mines ever opened in this section of the country, and this character is well known to the history of Mining in North Carolina, it being among the first Mines opened in this State.

Although this is one of the oldest Mines in the country, it has as yet but partially explored the late proprietor never would permit any person out of his own family to work the Mine, and they never were permitted to enter the lands he cultivated. There are about 550 acres in the tract, and but a small part of the tract has as yet been tested, but the part worked has yielded more Gold to the value than any mine ever opened in this Country.

Some of the rarest specimens of pure gold have been found at this Mine that have ever been found in the United States, and with one or two exceptions the largest mass of pure gold was found that we have any history of, it weighed 28 pounds, considerably weighed, a number of other large pieces have been found, weighing sixteen, thirteen, eleven and eight pounds, and so on, to the smallest particles.

These large pieces were found in an alluvial DEPOSIT near the surface. This deposit has been found very rich as far as has been tested, but the largest portion of it has been in cultivation by the late proprietor, and has never been worked but it is believed to be equally as rich as the part that has been worked. There are also a number of VEINS running through this tract of land which have been but partially tried, but as far as they have been tested are equal, if not superior, in value to any Veins that have been known in this country.

This valuable property has been thrown into the hands of a merchant, by the testator in trust that an equal distribution might be made among his children.

Payments will be divided into three equal parts, and one, two and three years time will be given, interest at the rate of six per cent., per annum will be charged upon the whole after the first year, the purchaser entering into bonds with approved securities for a discount of six per cent., will be made for cash payments. The notes of, or checks on, any species paying Banks in North Carolina, Philadelphia, New York, or Charlotte, will be received. Further particulars will be made known on the day of sale.

The Mine is situated fifteen miles west of Concord, in the State of North Carolina.
